SUMMARY

Senior Software Engineer with 7+ years of experience designing and developing enterprise systems, government platforms, and web applications for local and international clients. Specialized in .NET full-stack development, scalable REST APIs, payment gateway integrations, database-driven applications, and cloud-ready architectures.

Currently serving as a Lead Developer at the Bureau of Immigration (Philippines), leading the development and maintenance of the BI eServices platform and government system to system data sharing APIs. Also working as a freelance software developer, delivering web, API, and mobile solutions for businesses, startups, and private clients.

FEATURED PROJECTS

- BI eServices Portal
- Enerlytic Energy Real-Time Consumption Monitoring
- Bantay Pusta Gambling Protection Platform
- Backride Pinas Motorcycle Booking Platform
- Real Estate Management ERP System

TECH STACK
